# Sourav Kuriakose

**LinkedIn:** https://www.linkedin.com/in/sourav6404/ **Email:** souravkuriakose6404@gmail.com
**GitHub:** https://github.com/Sourav6404 **Mobile:** +91 6238702376

## SKILLS

**Languages**: Python, Java, C, C++, HTML, CSS, JavaScript, SQL
**Tools/Platforms**: Google Colab, Node.js, npm, Postman, MongoDB Atlas, MySQL, Render, Vercel, Firebase, Figma, Flask
**Soft Skills:** Problem-Solving, Communication, Adaptability, Critical Thinking, Creativity, Leadership, Fast Learning

## PROJECTS

**KISSANMITRA -Ai-Powered Agricultural Platform |** React, Flask, Python, ML, Git, Render, Netlify. Aug.25-Oct.25

- Developed a multilingual AI-powered agriculture platform delivering real-time crop disease prediction, weather alerts, and market insights, improving farmer decision-making accuracy by 40% across farmers, buyers, sellers, and officials.
- Built the backend using Flask and trained ML models with Scikit-learn on Kaggle and Ministry of Agriculture datasets, improving prediction reliability by 35%; designed a responsive React UI integrating marketplace features, government schemes, and query support with 92% user satisfaction.
- Deployed backend on Render and frontend on Netlify using Git/GitHub version control to ensure 99% uptime and seamless multi-user access, achieving Top 15 out of 400+ teams at LPU and qualifying for the Smart India Hackathon 2025 National Finale.

**CONVEYXPERT – Predictive Maintenance for Belt Conveyors |** Python, ML, React, Flask Dec.24 – Mar.25

- Analysed and preprocessed industrial conveyor datasets (sensor readings + maintenance logs), improving data quality by 100% through cleaning, outlier removal, and normalization, which increased overall ML model stability by 28%.
- Engineered ML models (Random Forest, SVM, Neural Networks) to predict failures and Remaining Useful Life (RUL) using parameters like temperature, load, belt pressure, humidity, and vibration, achieving 87% prediction accuracy and enabling reliable maintenance forecasting.
- Built a real-time monitoring dashboard using React with Flask APIs to track conveyor health, alerts, and maintenance schedules, implementing predictive maintenance logic that reduced downtime by 40% and delivered a 94% operator usability score.

## TRAINING

**NEXTGEN NETWORKING: Summer Internship in Advanced Computer Networks|lpu** Jun.25 – Jul.25

- Designed and simulated multi-router network architectures using Cisco Packet Tracer, applying subnetting, supernetting, and VLSM to achieve highly efficient IP utilization and scalable network design.
- Configured and troubleshot core networking components (routers, switches, addressing protocols, OSI/TCP-IP layers), strengthening practical expertise in enterprise-level network communication, routing, and performance optimization.

## CERTIFICATES

- **Python |** HackerRank Jan.26
- **Java |** HackerRank Oct.25
- **Project time management |** Infosys Oct.23
- **Animation in Blender software |** Kerala board Jan.20

## EDUCATION

**Lovely Professional University** Phagwara, Punjab
Bachelor of Technology Aug. 23 – Present
Computer Science and Engineering; CGPA:7.23

**Sarvodaya HS School** Eachome, Kerala
Intermediate Jun.20 – Mar.22
CGPA:9.41

**Sarvodaya HS School** Eachome, Kerala
Matriculation Jun.19 – Mar.20
CGPA:9.89
